Profile

I am a dedicated Software Engineer. With a strong passion for problem-solving, I have showcased my proficiency in

HTML, CSS, JavaScript, React JS, Angular, and Data Structures

through a diverse range of projects. My impressive track record includes creating interactive web applications, such as a dynamic lyrics website and a YouTube clone, reflecting my expertise in API integration, responsive design, and clean coding practices.

Education

2019/09 – present
cairo, Egypt

Student
Computer Science / Helwan University

Skills

HTML & CSS & Java Script

React Js

Angular

Tailwind Css

Using APIs

Data Structure & Algorithm

android studio

two college projects

Java

three college projects and android studio

C/C++

solved over 100 problem with c/c++ language

SQL

Git & Github

Languages

• Arabic

• English

Projects

ResWeb [🔗](#)

to see the project in action: <https://resweb.netlify.app/>

I designed and developed an innovative research-oriented website catering to students, researchers, and administrators. The platform facilitates skill enhancement through quizzes, enabling students to unlock courses upon successful completion. Researchers gain access to a rich repository of research ideas, collaborate through group chats, and contribute to projects. Admin privileges encompass overseeing users, content management, and course administration for an all-encompassing academic experience.

3algny

to see the project in action: <https://3algny.netlify.app/>

I designed and developed a website that offers a wide range of medical services and products that enable users to easily search and browse for doctors, reserve appointments, and engage in live chats with them. Additionally, the platform provides an extensive database of medicines for users to browse, search, and order from the comfort of their homes. The website aims to provide a comprehensive and convenient solution for users seeking healthcare services and products online.

Physio Time

to see the project in action: <https://physio-time.vercel.app/>

I designed and developed a website for a clinic called Physio Time to allow people to communicate with it's doctors through whatsapp or get directions to the clinic or reserve appointment , the doctor can view all his reserve appointments and cancel or edit on them he can also add new days or edit the times that the clinic is available on. this website is created using angular js
