Profile

a dedicated Software Engineer. With a strong passion for problem-solving, I have showcased my proficiency in **HTML, CSS, JavaScript, React JS, Angular, Express Js** through a diverse range of projects. My impressive track record includes creating interactive web applications, reflecting my expertise in API integration, responsive design, and clean coding practices.

Education

2019/09 – 2023/05
cairo, Egypt

B.Sc in Computer Science.

Computer Science / Helwan University

Graduated with a **GPA of 3.1**. In my graduation project, 3ALGNY, I achieved an excellent score of **97 out of 100**, underscoring my proficiency and commitment to delivering effective solutions, as outlined in the project section.

Professional Experience

2023/07 – 2023/09
cairo, Egypt

Frontend Developer

Freelance Project

Live Demo [🔗](#)

created an educational website with different parts. It has courses you can take, each with videos. making sure only the right people could access these courses. created a section for researchers to write, edit, and publish their papers easily. Another part encourages teamwork, letting users form groups, share ideas, and work together. added a chat feature for quick conversations and a dashboard for managing everything. Users can also get help by reporting issues.

designed the project layout and API interaction. used React.js and the Context API for state management. I handled forms by checking each field validation before submitting it to the server, employed hooks To reduce the website rendering, used useRef instead of useState in the user input fields and used useMemo to prevent unnecessary rendering, used react-router-dom for routing, and integrated tools like react-icons, SweetAlert and Toastr.

Projects

3algnny (React JS.) (Graduation Project) [↗](#)

project video [↗](#)

website that offers a wide range of medical services and products that enable users to easily search and browse for doctors, reserve appointments, and engage in live chats with them. Additionally, the platform provides an extensive database of medicines for users to browse, search, and order from the comfort of their homes. The website aims to provide a comprehensive and convenient solution for users seeking healthcare services and products online.

designed the project layout and API interaction. used React.js and the Context API for state management. I handled forms, employed hooks, used react-router-dom for routing, and integrated tools like react-icons, SweetAlert and toaster.

Physio Time (Angular & Express JS. & MongoDB.) [↗](#)

Live Demo [↗](#)

Backend Github [↗](#)

Frontend Gitgub [↗](#)

developed a website for a clinic to allow people to communicate with it's doctors through whatsapp or get directions to the clinic or reserve appointment , the doctor can view all his reserve appointments and cancel or edit on them he can also add new days or edit the times that the clinic is available on.

used angular to create this website making use of angular form validation, Structural Directives like ngFor and ngIf, used dependancy injection pattern to inject httpClient to communicate with the server, used activatedRoute to get the paramters from the url and used css for the style. I used Express JS. for the backend and mongo DB as database.

Personal Website (Angular) [↗](#)

Live Demo [↗](#)

My personal webiste with all my projects and professional work and contact information. made with angular

Lyrics (React JS & Rapid Api) [↗](#)

Live Demo [↗](#)

website to access different songs with it's lyrics.

this website is created using react js with tailwind css , rapid api and and responsive media query to support all screen sizes. clean code and solid principals are applied

Youtube Clone (React JS. & Rapid Api) [↗](#)

Live Demo [↗](#)

clone to youtube using react js and rapid api with responsive media query and search ability

Auto Motors (HTML & CSS & JS & JQ) [↗](#)

this was my first year project a website that allows you to watch cars details , reviews and prices and search by car type or car name i didn't use any framework in this website .
